The second level of the Kilohana boasts 3 large bedrooms, including the generous master suite complete with walk-in closet and private bath. On the first level, 2 bedrooms provide quarters for the rest of the family. This model has been enhanced with a super kitchen layout that features an island arrangement. A larger shower replaces the traditional tub in the master bath suite and bath #3. An automatic garage door is added for increased security, making it far superior to other models in its class.
